The results in the more recent events are more important in the ranking than the older ones, therefore the years 2023 & 2024 count only half as much as (50% of the earned points) the years 2025 & 2026 (100% of the earned points). The final position in the ranking is reached by adding the points of all the 4 years accordingly and then dividing them by 4.

In case two federations have the same number of points, the placement from the most recent year is compared to the determine the final position in the ranking. If this does not lead to a distinction between the federations in question, the comparison is made for the second most recent year, and so on, until a distinction can be made. In case this procedure does not lead to a distinction between federations in question, they are ranked in alphabetical order on the same ranking position.
